

Kiesub LB5001/D LED Prism Panel for Belly Glass in S2000 Slot Machines

MINIMUM ORDER: 20 PIECES

Kiesub LB5001/D LED Prism Panel for Belly Glass in S2000 Slot Machines

Manufactured in Kiesub Electronics' Contract Manufacturing division right here in Las Vegas.

Energy-efficient LED technology brightens machines-uses less power-saves money! Disperses LED light evenly and makes graphics glow. Refreshes the look of your machines with super-bright LED lighting. Much brighter than fluorescent or incandescent lamps.

Mounts in existing brackets in just seconds with no modifications. Bypass ballast and plug into existing harness. Operates from 24vdc of the machine.

20-1/2"w x 9-1/2"h

- LEDs last 50,000 to 100,000 hours (5 years)
- Generates less heat-cool to the touch
- Bypasses the ballast-no more ballasts to fail
- Saves on repair and replacement of other heat-sensitive components
- Machines can be opened or moved without lamp failure-no filaments to break
- Made in USA
