- Tests Continuity, Opens, Shorts, Crosses, Split Pairs
- Test Both RJ45 and Coax
- Cable Tracing Tone (Probe Available Separately)
- Ruggedized and Cushioned
- Built-in Storage for Remote
- Low Cost

### Product Description

CTX200 Pocket CAT is our most popular tester. Its ability to test CAT5/6 and coax cables, low cost, versatility and rugged design make it a popular choice

for toolboxes. The Cable Test/Tone unit identifies opens, shorts, crosses and split pairs with instant PASS/FAIL results. It also generates a tone for tracing cables.

Features: The Pocket CAT tests both RJ45-CAT5/6 and coax cables. It is ruggedized for field use with a cushioned case and has no LCD to break. PASS/FAIL results appear in one second and each pair's status is highlighted. A TIA568 test is performed: continuity, opens/shorts, reversals and split pairs. Includes tone mode for tracing and troubleshooting. A tone probe is not included. Other features: Auto-off (12 seconds) battery saver; low battery indicator; belt clip; battery (9V); and zippered pouch. Features of optional Tone Probe: The Tone Probe features high end probe technology for detecting the tone from the Main unit. Also included is an ultra bright LED lighted tip for seeing in dark closets; a safety LED to indicate "60HZ present"; a "Tone present" LED lights to aid in noisy environments; an insulated tip to stop accidental shorts when probing punch down blocks; and a volume control. Battery (9V) included.

Byte Brothers tools exhibit 3 qualities: Innovation- It moves our company and our customers forward. Top quality- work requires tools that repeatedly perform. Affordable- Tools are useless unless you can afford to buy them. Byte Brothers guarantees these 3 qualities plus offers US based customer support, training and quick upgrade and warranty service.
