

# Weller WM120 12 Watts, 120v Pencil Thin Soldering Iron

## Weller WM120 12 Watts, 120v Pencil Thin Soldering Iron:

**The simple answer to high quality, versatile ESD safe soldering.**

Enter the new age of ESD safe soldering with Weller®. Weller's new blue family of high precision soldering equipment is recognized throughout the industry as the most sophisticated and versatile, whether applied to electronic industrial needs, high volume assembly, rework or repair.

Reliable Weller quality is built into each compact unit which has its own extremely accurate temperature control system. All casings are made of durable electrostatic protective material in unique Weller blue. The iron stand may

be used separately from the main power unit or attached to either side for easy use by left or right hand. The stand has a water reservoir and storage space for six tips. Plus, the antistatic iron cord has flexible cord guard to extend cord life.

- Lightweight, pencil thin soldering iron with stay-cool handle
- Designed for soldering miniature components
- Develops tip temperature of 800°F
- 3-wire grounded plug
- Uses Weller MP series auto slide-in tips
- UL listed
